#### Review team declaration:

We confirm that for the purpose of this review:

- We did not have any conflict of interest with and is fully independent from the company listed above
- We had the review team has sufficient resources, and competences to complete its review and reach its conclusions,
- We had the appropriate credentials to perform this review in accordance with Global-Mark and applicable accreditation requirements.

#### Comment and disclaimer on this report:

- This report does not and should not be seen as advice. Please consult a qualified advisor or consultant for advice.
- Due to the sampling nature of third party business reviews, the time available and samples size, some issues, non-compliances or improvements might not have been identified in the present report. This does not imply that these issues do not exist, or are in compliance. Employees, management and other stakeholders of the organization need to and are responsible for, continuously identifying and taking necessary controls to ensure continued compliance with the standard(s), and improvement.
- Readers of this report should make judgement taking the above into account.
- The report is confidential, and is owned by the organization listed above, Global-Mark Pty Ltd and the review team members who participated in its preparation. The summary of it is publicly available through Global-Mark.
- Global-Mark reserves the right to make this report available to regulators, and/or funding providers if requested.

#### 1 Review team conclusions

This certified entity of Private Forestry Services Queensland is an Incorporated not-for-profit and throughout this report may also be referred to as PFSQ, client, organisation, or forest manager.

This one-person surveillance review over three and one-half days focused on stakeholder consultation, biodiversity forest productive capacity, ecosystem health, soil/water values, carbon as well as some of the management aspects of the FMS, including internal audits, corrective and preventive action, and management review processes. It included two full days in the field with site visits and assessments centering on the aforementioned criteria. Observations relating to other aspects of the standard are included where thought useful.

During this audit we closed both previous findings and raised seven new findings, five as observations. *Previous findings are shown in bold and italic font in the comment section of the report's main table.* The new findings are shown as red colour font in the comment section of the report's main table. Text with green highlight is for emphasis to the client.

Two matters of minor non-conformance were identified at this audit. The client presented corrective action plans for both by the audit exit meeting. Two new observations raised were also closed during the audit. This indicates prompt action by the client.

We believe that the organization listed above at the site(s) listed above has the capability to systematically meet the requirements of the Australian Forestry Standard and for the activities/products and sites listed on the Global-Mark scope of certification.

stakenotders:	graphics, which are on a cycle of posting.		
	The Full Cam software has been used by Field and GIS Officer to		
	create simulation at Gundiah. Sighted output showing carbon		
	stocks, which is a time series of estimates that include future		
	estimates that demonstrate the impacts of the operations		
	expected.		
What are any applicable qualifications	Plantations or reforestation sites are relatively small in area yet		
for scale and intensity, as referred to in	have intensively applied silviculture particularly at planting.		
AS 4708 or NZS AS 4708 (as applicable)?	Native forest operations are much less intensive in terms of scale		
	or other resources.		
What sampling methodology was used to	Prior to the audit the forest manager provided Global-Mark with		
determine the size of sample of active	a list of properties in the DFA as well as recent activities on		
blocks?	them. In past audits the sites visits have often covered a wide		
	geographic spread. This has resulted in long days with much		
	travel time. For the 2018 audit the ATL in consultation with the		
	client decided to focus attention in the Sunshine Coast to Gin Gin		
	region. The audit sampled in this region 100% [two of two] of		
	active reforestation sites, 50% inactive reforestation sites [one of		
	two], 100% of active native forest sites [two of two]. Hence,		
<b>/</b>	though none were sampled at random, the sampling covered five		
	of six potential sites. This means a potentially better outcome		
	than random sampling.		

Mandatory logo use checks	Audit team leader comments			
What are the licence registration	RW/1-21-23, AFS/1-21-23 and PEFC/21-23-23			
numbers provided by the Scheme	W			
Owner?	We note that the RW website has the name of the organisation incorrect with plural 'Services' rather than singular 'Service'.  During the audit Global-Mark emailed RW alerting them to this.  https://www.responsiblewood.org.au/certificate_holder/private -forestry-services-queensland-inc/			
What does the client store the licence agreement with the Scheme Owner?	On file server. Sighted scanned agreement dated 10/08/2018 between PFSQ and RW.			
Where does the client use the PEFC	On website:			
and/or Responsible Wood logos?	https://pfsq.net/australian-forestry-standard/			
	On templates for landscape map, portrait map and letterhead. PEFC is only on landscape.

Mandatory logo use checks	Audit team leader comments
In on-product and off-product use, how were the Logos reproduced according to the measurements, colours and other specifications detailed in the respective Logo Reproduction Tool Kit?	Standard green colour.
What if any additional voluntary	"Promoting sustainable forestry management" with PEFC logo on
information is included?	landscape map template. Nil on others.

# 2 Review teams findings (major, minor non-conformities or observations)

At the conclusion of this review the following presents the status of new and existing findings:

### Number of findings:

Finding Details	# Major non- conformities	# Minor non- conformities	# Observations	Total
Findings from previous audit(s) at start	0	0	2	2
[№ 41-42]				
Findings from above closed during this	0	0	2	2
audit [№ 41-42]				
New findings opened during this audit	0	2	5	7
[№ 43-49]				
New findings closed during this audit	0	0	3	3
[№ 43, 45, 48]				
Findings open at the end of this audit	0	2	2	4
[№ 44, 46, 47, 49]				

Some selected photos taken by the auditor are included below as further evidence to emphasise the report comments  $\frac{1}{2}$ 

Photo 1 - Weed identified and removed at Palmview.

Photo 2 - Coppice from stump of thinning at Moy's Pocket.

Photo 3 - Chemicals at related to finding № 34.

Photo 5- Area of recent active controlled burn at Boomerang.

Photo 6 - Two white wild horses centre of photo at Miva, with effects of wildfire visible.

Photo 7 - Poropsis beetle at Mt Urah.

Photo 8 - Visibly clear riparian water at Boomerang.

## End of report
