

# *Native Forest Management Field Day*

**Saturday 10th December**

**Time: 9.00am - 3.00pm**

**Presenters: Bill Schulke, Sean Ryan,  
Sam Slack**

***Impacts of thinning on forest health,  
productivity, economic returns and  
grazing within Spotted gum and  
Gympie messmate plantation and  
adjacent private native forest***

Poor environmental and productive condition

Highly productive forest with good ground cover

- Timber supply forecasts for the next 10 years, we need to ramp up productivity now!!!!
- What could be the impacts of a change to the Code of Practice for PNF
- Category F, private timber Reserves, securing your right to manage your timber, how does it work?
- Current timber products and what they are worth
- Inspect extensive thinning and long term timber production on tree health and improved ground cover
