

Native Forest Management Field Day

Thursday 8th December

Time: 9.00am - 3.00pm

Presenters: *Bill Schulke, Sean Ryan*

Impacts of thinning on forest health, productivity, economic returns and grazing within private native forest

Poor environmental and productive condition

Highly productive forest with good ground cover

- Timber supply forecasts for the next 10 years, we need to ramp up productivity now!!!!
- Impacts of a changes to the Code of Practice for PNF
- Category F, private timber Reserves, securing your right to manage your timber, how does it work?
- Linking timber producing with grazing management.
- Use of fire and herbicide to re-establish forest structure, health and sustainable production

Location: 160 Rocky Gully Rd, 26 km northwest of Crows Nest, east of the New England Hwy—Follow the Field Day signs (See over for google map)
